Data & Business Analyst | SQL · Python · Power BI · BigQuery · Data Analysis · Automation

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 2+ years of experience specialising in operational data analysis, business intelligence reporting, and workflow automation. Proficient in SQL, Power BI, Excel, Python, and Google Cloud tools — with a proven track record of converting complex high-volume datasets into actionable dashboards and MIS reports that drive operational efficiency. Backed by an MBA in Finance & Marketing that strengthens business problem understanding and stakeholder communication. Actively uses AI to accelerate analysis and automate reporting workflows.

TECHNICAL SKILLS

SQL: MySQL, RDBMS, Joins, Subqueries, CTEs, Window Functions, Query Optimisation, BigQuery (Google Cloud SQL)
Power BI & Visualisation: DAX, Dashboard Development, KPI Tracking, Performance Monitoring, Looker Studio
Python: Pandas, NumPy (Data Analysis & Automation), Matplotlib (Visualisation)
Cloud & Data Engineering: Google Cloud Platform (GCP), BigQuery, Google Cloud Storage, Data Pipelines, ETL Concepts, Cloud Data Transformation
Databases: MySQL, PostgreSQL, Relational Databases, NoSQL
Reporting: MIS Reporting, Data Cleaning, Data Validation, KPI Reporting, Looker Studio Dashboards

EXPERIENCE

Operations Analyst — Reconnect Energy Solutions, Bengaluru Sep 2024 – Present

- Reduced financial penalties by 50% and improved revenue by 20–30% by performing statistical variance analysis on target vs. actual performance data and delivering structured BI reports with prescriptive recommendations to senior stakeholders.
- Contributed to 8–10% compliance improvement by identifying performance deviations through daily trend tracking and translating findings into actionable recommendations for leadership decision-making.
- Improved KPI visibility across multiple business units by designing and maintaining 5+ Power BI dashboards tracking performance metrics, compliance data, and financial penalty exposure for finance and operations teams.
- Reduced manual reporting effort by 30% by automating recurring reports using Excel and Power BI, with ETL validation checks ensuring data consistency across systems.
- Collaborated with cross-functional teams to gather business requirements, translate operational problems into data-driven solutions, and produce weekly and monthly MIS reports aligned to business review cycles.

PROJECTS

Performance Monitoring Dashboard | Power BI · SQL · Excel

- Extracted and processed 200,000+ rows across 5+ datasets using SQL and Excel; built a scalable Power BI dashboard with DAX measures and location-level drill-through analysis — delivering real-time KPI visibility that enabled faster identification of underperforming locations and improved forecasting accuracy across regions.

Plant-Level Issue Tracker | Excel · Google Sheets · SQL

- Designed an automated Google Sheets tracker to centralise and prioritise recurring operational issues — reducing average resolution time from 4 hours to 20 minutes, an 83% improvement in operational efficiency.

EDUCATION

B.Tech in Mechanical Engineering — Mother Teresa Institute of Engineering & Technology (JNTUA) | 2019 – 2023

MBA in Finance & Marketing (Work-Integrated) — Kuppam Engineering College (JNTUA) | 2024 – 2026
