**Business Intelligence & Data Specialist | Power BI · Advanced SQL · DAX · Data Modeling · BigQuery**

## PROFESSIONAL SUMMARY

Results-driven BI Developer with 2+ years of experience specialising in end-to-end dashboard development, BI reporting workflows, and data visualisation. Proficient in Power BI, SQL, BigQuery, and Advanced Excel — with a proven track record of converting raw operational data into interactive dashboards that improve decision-making speed and reduce manual effort. Backed by an MBA in Finance & Marketing that enables stronger business understanding and stakeholder alignment when designing BI solutions. Actively uses AI tools to accelerate development and automate reporting workflows.

## TECHNICAL SKILLS

**BI & Visualisation:** Power BI (DAX, M Language, Data Modelling, Star Schema, Drill-through Analysis), Looker Studio, Interactive Dashboards, KPI Reporting, Performance Monitoring
**SQL & Cloud:** MySQL, BigQuery (Google Cloud), RDBMS, Joins, Subqueries, CTEs, Window Functions, Query Optimisation
**Excel:** Advanced Excel, Pivot Tables, Power Query, XLOOKUP, Data Cleaning, Template Automation
**Python:** Pandas, NumPy (Data Analysis & Automation), Matplotlib (Visualisation)
**Cloud & Data Engineering:** Google Cloud Platform (GCP), BigQuery, Google Cloud Storage, Data Pipelines, ETL Concepts, Data Transformation, Automated Refresh Cycles
**Concepts:** EDA, Business Intelligence, Operational Reporting, Data Warehousing Concepts, Star Schema Design
**Databases:** MySQL, PostgreSQL, Relational Databases

## EXPERIENCE

**Operations Analyst — Reconnect Energy Solutions, Bengaluru** Sep 2024 – Present

- Designed and deployed 5+ Power BI dashboards across business units — tracking operational performance, compliance metrics, and financial penalty data — providing real-time KPI visibility to finance and operations teams.
- Built interactive location-level dashboards identifying consistent outperformers and underperformers — improving location-wise performance accuracy by 8–10% through data-driven drill-through analysis.
- Transitioned manual reporting workflows into automated ETL pipelines using Power Query and M Language — reducing manual reporting effort by 30% with reconciliation checks ensuring data consistency across systems.
- Contributed to a 50% reduction in financial penalties and 20–30% revenue improvement by detecting critical performance deviations through dashboard-driven monitoring and automated data validation rules.
- Produced weekly and monthly MIS reports and ad-hoc analysis for finance and operations stakeholders — supporting data-driven operational decisions across cross-functional teams.

## PROJECTS

**Comprehensive Qualitative & Operational Analysis — REConnect Energy Solutions | MBA Project** | Excel · Business Analysis · BI Reporting

- End-to-end financial and strategic BI analysis of a 38+ GW energy portfolio — quantified DSM penalty impact, derived 1:7.5 ROI ratio, and delivered investment-grade strategic recommendations through structured Excel models and visual reporting.

**Performance Monitoring Dashboard |** Power BI · SQL · Excel

- Extracted and processed 200,000+ rows across 5+ datasets using SQL; cleaned and validated data in Excel; built a scalable Power BI dashboard with custom DAX measures, Star Schema data model, and location-level drill-through analysis — delivering real-time KPI visibility that improved forecasting accuracy across regions.

**Plant-Level Issue Tracker & Automated Reporting Workflow |** SQL · Excel · Google Sheets

- Designed an automated Google Sheets tracker with SQL-driven data validation and structured data fetching — centralising recurring issue logging and prioritisation, reducing resolution time from 4 hours to 20 minutes (83% improvement).

## EDUCATION

**B.Tech in Mechanical Engineering —** Mother Teresa Institute of Engineering & Technology (JNTUA) | 2019 – 2023

**MBA in Finance & Marketing (Work-Integrated) —** Kuppam Engineering College (JNTUA) | 2024 – 2026
